

COLOR CODING

The Pegasus Color Coding system is comprised of four different color marking strips (red, green, yellow and blue) that are adhered to the handles of Pegasus trays and bins. The vibrant colors are immediately recognizable, even at a distance

Benefits of Color Coding

- ✓ Improves visibility, nursing satisfaction and improve patient care.
- ✓ Clinical trials show that nurses spend up to **20% more** of their time searching for supplies instead of focusing on patient care.

Systems with Color Coding
